BEWARE: Today my mum was sitting out the front of her house with an elderly friend and was approached by 2 men wearing work gear. They said to her 'remember me?' She said 'no' they said 'we did work on your house a while back'. Mum called Dad out, as they were getting closer. They said the same thing to Dad. When he told them in no uncertain terms that he didn't know who they were/they hadn't done work on the house, they suggested to him that they come inside to assess what repair work needs to be done on the house. Good job Dad is savy, as he said, 'No, this is a scam'. They quickly hopped in their vehicle and sped off so fast he couldn't get their number plate. Also, couldn't get any images on the security camera as they didn't get close enough. It was a white work vehicle. One was tall and thin build and the other one shorter. Location: Boronga Ave.

07 September, Ryde Police Area Command

Organised Crime Squad detectives have charged a man over the alleged supply and manufacture of methylamphetamine in Sydney's north.

Last month, detectives from the State Crime Command's Organised Crime Squad established Strike Force Aldred to investigate the alleged manufacture of prohibited drugs, mainly methylamphetamine.

Following extensive inquiries, strike force investigators – with assistance from the Public Order and Riot Squad – executed a search warrant at a Gladesville home about 7.45am yesterday (Wednesday 6 September 2023).

Upon entry, police located an active clandestine laboratory, with specialist police from the Drug and Firearms Squad's Chemical Operations Unit attending to process and dismantle the lab. It's expected this will continue into today (Thursday 7 September 2023).

During the subsequent search of the home, officers located approximately 50kg of crystallised methylamphetamine being extracted from inside metal food tins, and equipment consistent with the manufacture of methylamphetamine. All items were seized for further forensic examination.

Following additional inquiries, officers arrested a 43-year-old man at a home in Pymble about 8.10am. Police executed a search warrant at the home where they seized cash, mobile phones, jewellery, and electronic devices.

Two additional search warrants were executed at storage sheds at Gladesville and Petersham about 3pm, where officers located several boxes of imported food products, also believed to contain methylamphetamine.

Pending further analysis of the items seized, police estimate the amount of methylamphetamine seized to be in excess of 100kg.

The man was taken to Hornsby Police Station and charged with manufacture and supply large commercial quantity prohibited drug.

He was refused bail to appear at Hornsby Local Court today (Thursday 7 September 2023).

Organised Crime Squad Commander, Detective Superintendent Peter Faux, said the swift work of detectives over recent weeks has resulted in this prompt arrest and seizure.

“We will allege in court this laboratory was extracting drugs which had been imported via a complex concealment method in cookie tins and soup containers. This is a clear example of the lengths organised criminal networks will go to in an attempt to bring drugs in.

“Our capabilities to identify and detect illicit drugs only continues to improve, with the assistance of our national and international law enforcement partners.

“NSW Police is now working with international agencies to identify any other persons potentially involved in this alleged importation.”

Investigations under Strike Force Aldred are continuing.

07 September, from 7news.com.au: 'Potentially hazardous material' found at Castle Hill High School in Sydney amid asbestos investigation

The material was found in a sealed box in the science block's storeroom.

A "potentially hazardous material" has been discovered at a high school in Sydney's northwest, amid an investigation into asbestos, which was previously found onsite.

The material was found on August 30 in a sealed box as a storeroom of Castle Hill High School's science block was being searched for potential asbestos, following the discovery of white powder.

The "potentially hazardous material" in the box was initially reported by sources to be yellowcake. Yellowcake is a uranium concentrate previously used in science classes to test for radiation.

- **Tip #2.** Consider using a third-party payment system such as PayPal for Internet transactions, to avoid entering credit card details into websites. Consider having another credit card with a low credit limit to be used specifically for internet purchases, or for overseas.
-

- **Tip #3.** Never share your card PIN. Beware sharing the 3-4 digit Card Verification Value (CVV), usually on the back of a credit card.
Immediately sign new cards

- **Tip #15.** Avoid using public hotspots (cafes, airports, hotels). Use mobile data instead. If you do use a public hotspot, get your device to 'forget' it once you are done.
- **Tip #18.** Do not open suspicious texts, pop-up windows or emails/attachments – delete them. If unsure, verify the contact through an independent source such as a phone book or online search. Do not use contact details provided in the message sent to you.
